Mazda Map Sd Card Download

I am hoping to be able to remove it from my iPhone, and enable it on the CX-5 For a better experience, please enable JavaScript in your browser before proceeding.. I think all they have have to do to add navi is install the card and maybe some software.. Mazda Map Sd Card Driver Side OnDoes anyone know what this is Secondly, while using the TomTom navigation system I noted a section for traffic.. I assume the CX5 navigation would likely be in a similar situation I just got my CX5 yesterday, and am waiting on a quote to get navigation added on.. Mazda Map Sd Card Driver Side OnNear the door on the driver side on the higher end models is an SD slot.

I personally have only driven a Touring so I did not see an SD card This is interesting news though as I did not know the GT came with an SD slot.. it only takes about 20 mins from what I have read This one is actually pretty useful and user friendly to boot.. The slot is like others here are saying, its for the navigation system TomTom also allows MapShare - which is a group sharing of map errors.. Anyone have any information (or better still, references from owners handbooks).. I couldn't figure out how the CX-5 was going to (a) log into TomTom to confirm a traffic subscription and (b) download traffic information.
